5500k

GlassCrafters' lights range between 2700-3000 Kelvin color temperature.

Specifically designed to precisely project light at the user's face, reducing shadows for makeup or shaving applications.

We have found that 2700-3000 Kelvin color temperature (warm white light) with a color rendering index of 80-90 (for enhanced skin tones) provides the best environment for personal grooming tasks.
